Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4, 7 and 14 are rejected under 35 U.S.C. 102(b) as being anticipated by Kepler (4,248,430). Regarding claim 1, Kepler discloses a golf ball engagement and support member comprising a first portion (10) having top, bottom and rear surfaces and a hole (26) for receiving a shaft and a second portion (20, 21) having first and second ball support and engagement arms. The arms define a space smaller than a golf ball (note Figures 1 and 2) that communicates with a cavity. The arms have curved surfaces that are disposed about the cavity and converge at the first portion.

Regarding claim 2, note Figure 1 showing the arms decreasing in height towards their distal ends.

Regarding claim 3, note Figures 1-3 showing the ends of the arms decreasing in width.

Regarding claim 4, note Figures 1 and 2 showing the proximal ends (30, 31) of the arms joining the first portion.

Regarding claim 7, note Figure 2 showing the pointed ends of the arms directed towards each other.

Regarding claim 14, the golf ball engagement and support member of Kepler is of integral construction.

Claim Rejections - 35 USC § 102/103

Application/Control Number: 10/695,701

Art Unit: 3711

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 3. Claim 9 is rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Kepler (4,248,430). Note Figure 1 of Kepler showing the bottom surfaces of the first portion and second portion being flat and co-planar.

In the alternative, it would have been obvious to one of ordinary skill in the art to form the first and second portions flat and co-planar in order to provide a smooth surface for sliding the tool over the ground surface.

Claim Rejections - 35 USC § 103

4. Claims 5 and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kepler (4,248,430) in view of Shine (5,692,968). Shine discloses a golf putter including a golf ball retriever. The retriever comprises a pair of arms (33) having upper surface segments and side surface segments that are adjoined at a curved edge. It would have been obvious to one of ordinary skill in the art to curve the edges between the upper surface segments and the side surface segments on the arms of Kepler in order to limit the sharp edges of the golf putter.

Claim 13 is rejected under 35 U.S.C. 103(a) as being unpatentable over Kepler (4,248,430) in view of Gunderson (6,497,628). Gunderson discloses a golf club comprising top surface having a plurality of angularly disposed surfaces (13, 25). It would have been obvious to one of ordinary skill in the art to form the top surface of Kepler with a plurality of angularly disposed top surfaces in order to provide desirable toe and heel weighting for the putter head.

Page 4

Allowable Subject Matter

Claims 8 and 10-12 appear to read over the prior art of record.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Steven Wong whose telephone number is 703-308-3135. The

examiner can normally be reached on Monday through Friday 7am-3:30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Greg Vidovich can be reached on 703-308-1513. The fax phone number for the

organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications

may be obtained from either Private PAIR or Public PAIR. Status information for unpublished

applications is available through Private PAIR only. For more information about the PAIR

system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR

system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
